What is MSTM Club/Innovation Cell.

MSTM is an acronym for Maths, Science, Technology and Management education. We focus on these areas together not only because the skills and knowledge in each discipline are essential for student success, but also because these fields are deeply intertwined in the real world. It is a society, which helps in the development of scientific, Technological and Managerial attitude to develop a genuine interest in Maths, science, Technology and Management activities, supplements the work of the classroom and the laboratory, and parts the syllabus on a practical basis.

What we Do in MSTM Club

The Maths, science, Technology and Management club aims to help Teaching and nonteaching faculty's and students in developing scientific attitude in life through activities like science quiz, science exhibitions, science fairs, model-making, discussions, etc.

Encourages the use scientific knowledge and its technological application for the welfare of society.

This club through scientific clarification expose to so-called supernatural events and spread scientific temper. this club may play a crucial role in communicating science and Technology.

This club focuses on **“providing a platform for the application of knowledge through Project Based Learning.**

In schools, this club help the students to acquire basic knowledge of science, Technology, and Management. Develop a scientific way of learning and increase awareness concerning scientific issues in personal, social, environmental and technological framework.

Who can Join

This Club open for Engineering, Management, and School students, teachers, parents, Teaching and non-teaching faculty members and community members.

Why Join Us?

To facilitate Faculties, students and Parents with easy self-learning, here at MSTM Club we provide a technical exposure to Members by having them engaged in Conferences, Seminars and Workshops of National and International level. Students get thoroughly guided regarding research, research journals and in writing research papers. You will also be nurtured in a way that will help you build several projects and organize events. At the end of the day this club is for your development and here at MSTM Club we value that aspect by mentoring and providing best guidance, resources while also introducing you to a community of likeminded people looking forward to each other's progress and being there for each other.

Objectives of MSTM club

- To cultivate interest among the students to learn science and use their time properly while making them understand the value of time.
- To encourage the students to actively participate in activities organized by the club.
- To promotes the utilization of Information Technology in Science learning.
- To provides an opportunity for the students to comprehend science through experimentation.
- To provide incentive and inspiration for the quest of scientific knowledge by broadening the scientific point of view.
- To bringing the school close to the society and explains to the people the services and contribution of science in their lives. And to develops the spirit and attitude of healthy competition among the students for the individual and social cause.
- To supports the students in imbibing the habits of self-dependence, self-reliance, and love for manual work. And providing an opportunity for the development of explorative, constructive and inventive faculties of the students.
- To provide an opportunity for the students to practically apply the knowledge related to different branches of science. By developing training in the scientific method of problem-solving and inculcates scientific attitude.
- To encourage individual and group activities while promoting the development of scientific interest and inculcates a sense of healthy competition. It keeps the students in touch with the recent advancements in Maths, Science, Technology and Management.
